Graduates – Investment Banking

Think about everything you want from a career, and then ask who can make you the perfect offer. Decide whether you want to work for another firm, or for a firm where we actually do believe that our graduates are the future.

With the support of a parent bank with a balance sheet of over £520 billion, we have offices in 22 countries

employing over 8,000 people. Only eight years old, we are expanding every year.

So yes, we are a world leading investment bank, but we are also a meritocracy where the individual is valued, but the team is paramount. We truly believe we are different. So, if you have an outstanding undergraduate or master's degree, visit our website for more information.

You'd be surprised what we get up to...

Graduate Opportunities Nationwide – Autumn 2006

When you hear the name PricewaterhouseCoopers, you might think all of our people are very much the same. In fact, we need our workforce to truly reflect the diverse world in which we operate and we really value the things that make everyone different, including what they do in their spare time. Whether that be spotting planes or jumping out of them for fun! So if you're thinking a career at PwC may not suit you, you might be surprised to find lots of people here who are similar to you, and lots of people who aren't. But that's not the only surprise you'll find here.

Another big surprise is that careers at PwC are about much more than simply number-crunching. Whether we're auditing a company's financial results, identifying the commercial risks they face, helping with tax planning or assessing the implications of strategic business decisions – it's about getting beneath the skin of other organisations*. So wherever you join us, you'll be dealing directly with clients right from the start, while working towards a professional qualification. And since the challenges we face span virtually every industry sector, the depth and breadth of experience you'll gain will equip you for an exciting career.

Even more surprising, you don't need a business or finance degree to join us. Yes, you've got to be comfortable dealing with numbers and you must have a strong academic record. But the subject of your degree is less important than your willingness to contribute and your eagerness to learn.
